Professional Summary

Motivated **Computer Science Engineering** student with a strong foundation in **data analytics, Python, SQL, and statistical analysis**. Experienced in **data cleaning, data manipulation, and visualization using Pandas, NumPy, Excel, Tableau, and Power BI**. Skilled in writing efficient **SQL queries**, building insightful dashboards, and applying analytical thinking to solve real-world problems. Eager to contribute as a **Data Analyst in a collaborative, data-driven environment**.

Skills

Programming: Python

Data Analysis: Exploratory Data Analysis (EDA), Descriptive Statistics, Probability, Regression, Hypothesis Testing

Databases: SQL (MySQL)

Data Tools: Excel (Pivot Tables, VLOOKUP, XLOOKUP), Google Sheets, Jupyter Notebook

Data Visualization: Power BI (Dashboard Development, DAX Basics), Tableau, Matplotlib, Seaborn

Data Manipulation: Pandas, NumPy

Version Control: Git, GitHub

Education

Sharad Institute of Technology College of Engineering

Bachelor of Technology in Computer Science and Engineering; CGPA: 6.92

Ichalkaranji, India

October 2022 - May 2026

Mahatma Gandhi Vidyamandir and Junior College

HSC, Class 12th: Grade: 62.00%

Vita, India

March 2021 - March 2022

Mahatma Gandhi Vidyamandir

SSC, Class 10th: Grade: 79.80%

Vita, India

March 2019 - March 2020

Internships

Maxgen Technologies Pvt. Ltd. | *Data Analyst Intern*

2025 – Present

- Performed data cleaning, preprocessing, and analysis using Python (Pandas, NumPy) and SQL to extract meaningful insights.
- Developed interactive dashboards in Power BI to visualize key metrics and support data-driven decision-making.

Tecspeak IT Solutions | *Python Development Intern*

2023

- Developed Python scripts to automate data processing tasks, reducing manual effort by 20% and improving workflow efficiency.
- Optimized backend logic and performed data manipulation using Pandas and SQL to enhance processing performance.

Projects

Banking Customer Analysis Dashboard | *SQL, Python, Power BI, Excel*

2026

- Analyzed 3000+ banking customer records using SQL and Python to uncover key behavior patterns and financial insights.
- Developed an interactive Power BI dashboard with KPIs for customer segmentation, account activity, and revenue contribution.
- Identified high-value customer segments and generated actionable insights to support targeted marketing and retention strategies.

Cryptocurrency Market Analysis | *Python, Pandas, NumPy, Matplotlib, Excel, Power BI*

2026

- Developed a cryptocurrency analytics pipeline using Binance and CoinGecko APIs, analyzing 5800+ records.
- Performed EDA and applied Sharpe Ratio and Drawdown analysis for risk evaluation.
- Built an interactive Power BI dashboard to visualize trends and insights.

Customer Behavior Analysis | *Python, Pandas, NumPy, Power BI, SQL, Excel*

2025

- Performed exploratory data analysis (EDA) to identify customer behavior patterns, purchasing trends, and engagement drivers.
- Applied data preprocessing, feature engineering, and statistical analysis using Python to extract meaningful insights.
- Designed visual dashboards to enable customer segmentation and support data-driven business decisions.

Certificates

Data Analytics Job Simulation - Deloitte

Foundation of Data Analytics - Google Digital Garage

Tata Data Visualisation Job Simulation - Forage

Additional Details

- Languages:** Marathi, Hindi, English
- Interests:** Data Analysis Visualization, Exploring Real-World Datasets, Sports
